100 tablets of 460 mg, total net weight 46 g e

In the same family:

Alato 28 - Fluid extract

cardiovascular disease

HERBS PRESENT IN THE PRODUCT

HAWTHORN

It is a nervous and cardioprotective sedative. It has a sedative action in precordial pain and finds indications in heart failure and associated symptoms, in coronary spasms, in angina pectoris, in tachycardia, in extrasystoles and in arhythmias without specific organic cause. It causes a dilatation of the abdominal blood vessels and especially of the coronary ones with the consequent reduction of the arterial pressure. Useful in cases of heart failure: it lowers heart rate, decreases swollen ankles and blood pressure and increases contractile strength.

LEONORUS CARDIACA

Sedative plant with particular indications for irregular heartbeat and cardiac neurosis. It regulates heartbeats, strengthens the heart muscle, relieves pain in angina, has a hypotensive action. Useful in case of heart palpitations, precordial pain from erethism. Indicated in functional tachycardia and as a complement in the therapy of arterial hypertension and heart failure.
