cardiovascular disease

HERBS PRESENT IN THE PRODUCT

POTASSIUM BICARBONATE

The sphere of action of potassium bicarbonate are the immune system and cardiovascular system: if we consider that these are the pathologies that most afflict our society, we can understand how useful it can be and how many people can benefit from it. Because of this it is not easy to talk about this product: it would look a panacea by listing its effects. It should always be combined with half a small teaspoon of pure powder vitamin C, poured together and mixed in half a glass of water so that the potassium bounds with vitamin C and forms potassium ascorbate.
